

# New L1T DQM Offline Tag

- A new tag for the L1T DQM Offline is now undergoing test and validation for deployment on the CMSSW\_6\_2\_0 cycle.
  - This release is the current development version of CMSSW and is targeted to upgrades studies.
  - If important tools are deployed requests may be maybe to back-porting to CMSSW\_6\_1\_X to be used in any DQM reprocess of 2012 data.
- Code includes besides minor debugging new Module to calculate muon efficiencies and resolutions.

# CMS Monitoring Upgrade Meeting Report

- First CMS Monitoring Upgrade Meeting happened 28<sup>th</sup> March.
  - Discussion about definition of the common interface/API/aggregator for CMS monitoring.
  - The aim is to simplify data flow between information producers and monitoring tools for CMS as a whole
  - Several options discussed including reusing code already available in the experiment (from the CSC group) and expanding it.
  - Meeting will become periodic and I will be reporting shortly after.
