L1T DQM News

João Pela
Imperial College London

News I

- New tool online L1TBPTX (presentation today)

- Splitting of L1T certification flag into too flags: L1TCalo and L1TMuon.

  - This was agreed with the central DQM and certification teams to reflect the fact that L1T actually can have problems that affect only Calo or Muon triggering.

- Update of the L1T Shifter instructions.

  - To reflect the split to too flags.

News II

- Bug found on L1TOccupancy found

  - Affected histograms that have masked bins/strips

  - The test will not run when masked bins are found

  - Currently affects the monitored DTTF Occupancy Plot.

  - Will be corrected and new tag deployed asap including this.

L1T DQM on and after LS1

- Discussion as started about the DQM role during and after LST.
  - Using DQM as a central "plotting" service for development during LS1
    - Need for infrastructure at 904
  - Develop a system that would allow fast testing and integration for new parts into the final system
  - <Your Ideas here>
